

ROLLER SLIDE

SPI Play
The Future of Play

Introducing the new "ROLLER SLIDE" from SPI Play

The new Roller Slides provide a great alternative to standard slides. Made using PVC rollers and precision bearings the slide is both durable and visually attractive. Unlike conventional slides, using rollers allows the child to generate similar speeds over a reduced angle, making it accessible to younger children who may be apprehensive about the height of standard slides. Using rollers also allows the child to vary their speed depending on how much effort is used to start. The rollers combined with the soft foam peaks make it very difficult for any child to climb up, reducing the chance of injury. The slide is also suitable for use with plastic sledges for added enjoyment.

Product Specification:

Product Type: Slide

Age Range: 5+

Height: 900, 1200 & 1500mm

Colour Options: Various

Theming Options: Themed drapes to sides

Maximum Fall Height: 900, 1200 & 1500mm

Capacity: 1

Notes: Country operating instruction apply.
